

Individual Response to Work Group B
Donald S. Frazier, Ph.D.

By and large, the contribution of Work Group B made great refinements to the TEKS document as part of the cumulative process of building out an excellent body of content for Texas students.

My personal recommendations (heavily influenced by conversations dating back to 2022, public testimony, and discussions with fellow Content Advisors), but I defer to the consensus document as a useful collection of the collective wisdom of the content advisors. Some general observations are we need to make sure that slavery is presented as a human phenomenon, and not solely an American institution.

In addition, friends in education made the following comments on high school courses on economics and personal financial , and I send those along with my endorsement for your consideration as an appendix at the end of this report.

The process is working. At this point in the process, we have heard from a host of educators, stakeholders, and citizens. Now, the elected members of the State Board of Education will weigh in, armed with views from a wide variety of important perspectives.

Good luck and Godspeed as the journey continues.

1	(E)explain deviant behavior and how this behavior is viewed and treated in society (Geo/C)	<p>Introduces deviant behavior and how it is viewed in society. Deviance is a major topic within the field of Sociology. Simply put, deviant behaviors are violations of established cultural or social norms or established laws. Because it has theoretical depth and breadth, it is recommended to highlight its most salient features, like social control, social order, positive sanctions, negative sanctions, informal sanctions, and formal sanctions. Drawing distinctions between criminal and non-criminal deviant behavior will facilitate further understanding of the concept.</p> <p>Amend to: Identify key aspects of deviant behavior and how it regulates conduct in society including formal violations of official, codified laws and norms and informal minor violations of unwritten social rules or customs. (G/Civ, H, Geo/C)</p>

This also connects to Washington’s Farewell Address 1796 that is found in United States Government, Citation 3(D).</p> <p>Amend to:</p> <p>Analyze the meaning of Lord Acton’s quote that “Power tends to corrupt; absolute power corrupts absolutely” with George Washington’s voluntary</p>

8	(C)identify systems of social stratification (Geo/C, E);	<p>Deleted Robert Putnam’s view on the civic value of social capital utilizing from primary sources. The loss of belonging (or the social glue that makes community) has led to loners who become detached from social, associational, and civic life. Loneliness is a modern-day epidemic. Value if found in our communities and the social structure.</p> <p>Also adds social stratification as content for social capital. Recommend the full deletion of social stratification because it is a different and distinct topic and will confuse the teacher and students.</p> <p>Amend to:</p> <p>Evaluate Robert Putnam’s view on the importance of civic engagement and social capital in democratic life including voter turnout, social trust, political engagement, and community well-being.
